pn, 13 rugs. 2019 17:52:00 GMT - mc-TY-circles-2009-1 In this unit we find the equation of a circle, when we are told its centre and its radius. There are two different forms of the equation, and you should be able to recognise both of them. We also look at some problems involving tangents to circles.

- The reason so many people joined wasn't because of me or my slides, it was because they were hungry for

something they could do to invest in themselves. Although most had never heard of working out loud, the ideas seemed like common sense and the circles gave them a way to apply that common sense towards a personal goal they cared about.
